Experience

Initech, Israel, Remote | Full Stack Web Developer | 04/15 - 01/24

- Worked on many projects from small fast tasks to bigger multi team operations.
- Built static websites, blogs, commercial stores, social networks and specialized applications.
- Used cloud services for deployment, managed services and storage including AWS, GCP, DO and Rackspace.
- Integrated myriads of services in the likes of: maps and location, social sharing, analytics, payments, notifications and video.
- Worked with project managers and directly with the clients, in some projects was leading the development as well.
- Maintained the whole server stack for several big projects.

accomplishments:

- Inner Dashboard Development: developed admin panels & dashboards for project teams in areas of finance, SEO, AI & marketing.
- Full project development: implemented and deployed projects from scratch in the marketing, social, online merchandise & other domains.
- API Development for several domains, from small to big integrations
- Project Lead and main developer: migrated, refactored and maintained a highly complex social network.
 - Migrated the whole backend from vanilla PHP to Django & adapted it for the client side application.
 - Adapted the old Cordova application to the React ecosystem & integrated it with payment services, including a generic payment backend which was also using Authorize net platform.
 - Secured and scaled the web stack to reach 10K+ daily users
 - Written a custom administration, marketing, KYC & promotion backends for the client

A.K.B, Israel | Web developer | 03/13 - 10/14

Worked on the PHP backend of a video chat application and did maintained the Linux STUN/TURN servers.

accomplishments:

- Rewritten an unstable backend written in vanilla PHP to use Laravel and reduced the codebase significantly.
- Was responsible for maintaining the ICE servers which were used by the Java code.

Education

- Self Studied BSc in CS, 2019 - 2022, Coursera
- Courses, books and projects: ongoing, Online

Projects

- Sonador - music streaming app & media server. Python (starlette), JS (React), ongoing
- Lifetorio - skills focused progress tracking inspired by the factorio research UI. Elixir (Phoenix), ongoing

Languages

- English: fluent
- Hebrew: fluent
- Russian: fluent but not as professional
- Spanish: beginner - intermediate level

Hobbies

- Learning low level programming and cyber security
- Playing and making music
- Reading books
- Cooking
